

Lawyers & Project Managers

Construction project managers can assist property lawyers by providing valuable, practical insights into the construction process, project timelines, and potential risks, which are critical for informed legal advice and contract negotiations. A very experienced cross sector project manager such as Kingsman PM, can be an invaluable 'on call' ad hoc resource for law firm Partners and staff to have easy access to, a project manager can quickly and efficiently assist with:

Project Knowledge and Expertise: Project managers possess in-depth knowledge of construction processes, timelines, and potential issues, which is crucial for lawyers to understand the context of legal matters.

Contract Interpretation and Administration: Project managers can interpret construction contracts and understand their practical implications, assisting lawyers in advising clients on their rights and obligations.

Risk Assessment and Management: Project managers can identify and assess potential risks on construction projects, helping lawyers advise clients on how to mitigate those risks and protect their interests.

Dispute Resolution: Project managers can assist in gathering information and evidence related to disputes, which can be crucial for lawyers to develop effective legal strategies.

Expert Witness: In some cases, project managers can serve as expert witnesses in legal proceedings, providing technical expertise and insights into construction-related matters.

Practical Advice: Project managers can provide practical advice on how to manage construction projects effectively, which can help lawyers advise clients on how to avoid legal problems in the future.

Contract Negotiation: Project managers can assist in negotiating construction contracts by providing insights into the practical aspects of the project and the needs of the client.

And visa-versa - System Development and Training: Construction lawyers can offer support through systems development and training, ensuring that project managers are equipped to deal with any potential issues that might arise on a project.
